EXPERIENCE

Encoders | PHP Developer

09/2024 – Present

- **Project-k (SaaS-based Platform) – PHP, Laravel 10, MySQL**
 - As a PHP Developer, I had the opportunity to work on an extensive **SaaS-based** project named 'Project-k', using PHP, Laravel 10, and MySQL, following the MVC framework for better organization.
 - Added features in the **Diary module** include team options, comment box, employee tagging, team-wise employee tagging, role-based functionalities and Work Management, and Client Management modules with **real-time chat** system using **Firebase** for better usability and performance, near 12 modules.
- **TyreSasta (E-commerce Web App) – CodeIgniter 4, MySQL**
 - Designed and built 'TyreSasta', a full-stack e-commerce web application using CodeIgniter 4, featuring advanced product listing with multi-level filters (brand, size, category, discount, price range), **CMS, cart, checkout, GST calculation, promo code** logic with Razor Pay integration.
 - Made a complete admin panel to manage products, stock, orders (5+ categories), and implemented structured billing/shipping modules with validation, auto-fill, tax calculations and invoice generation.
- **Lonestar (Medical Equipment Rental App) – Laravel 10, MySQL, mPDF**
 - Working on a medical web application for an equipment rental organization, with modules for renting, installation, deinstallation, and invoice generation, built using Laravel 10 MVC. Structured workflows to manage rental lifecycles and automated invoice creation based on rental status.

Learning Session | PHP Developer Intern

12/2023 – 02/2024

- **GSheet-manager (Edtech Admin Portal) – CodeIgniter 3, MySQL**
 - As a PHP Developer Intern at Learning Session, I worked on the 'GSheet-manager' project using **CodeIgniter 3**, there are three user roles with separate dashboards for task management. Created key modules like **student attendance, task tracking**, and a **passbook** to manage income and expenses by category and PDF generation.

SKILLS

Programming Languages: C++, Python

Frontend Development: HTML5, CSS3, JavaScript, AJAX, jQuery

Backend Development: PHP, MySQL

Framework: Bootstrap, CodeIgniter, Laravel

Others: GitHub, Git, Postman, FileZilla,

Firebase, C-Panel, SMTP, ChatGPT

PROJECTS

Chat Application 🔗

04/2024 – 05/2024

- Developed a fully responsive, real-time one-on-one chat application using Laravel, ensuring seamless performance and user experience across a wide range of devices and screen sizes.
- Incorporated user authentication through **Laravel Breeze**, providing secure login and registration processes, enhancing the overall security and usability of the application.
- Created real-time message broadcasting using **WebSocket** and **Pusher**, efficiently leveraging MySQL for data storage, and optimizing the user experience with **Laravel Echo**, jQuery, and Ajax for smooth and secure interactions.

PORTFOLIO 🔗

11/2022 – 02/2023

- A sleek online **portfolio** showcasing my resume, projects, and skills. Engaging planned, easy navigation
- Designed with a focus on simplicity and ease of use, the portfolio achieves full responsiveness across all devices using JavaScript and Bootstrap and features seamless communication through direct mailing with **Email.js**.

EDUCATION

Government College of Engineering & Textile Technology, Berhampore

2020 – 2024

Bachelor of Technology in Mechanical Engineering

CGPA – 8.14
